CRYPTO STRENGTH METER™

QUICK OVERVIEW

Get familiar with the key components of the Crypto Strength Meter.

1 RANKED CRYPTO TABLE

Shows the tracked crypto assets from strongest to weakest.

2 STRENGTH BARS

Quick visual comparison of each asset's relative strength.

3 SCORE & SIGNAL

Higher scores mean stronger relative strength. Arrows help show bullish, neutral, or weak direction.

4 COIN TO WATCH

Highlights the scanner's top crypto setup versus USDT.

5 CURRENT CHART

Compares the chart you are viewing with the same strength engine.

6 MARKET CONTEXT

Market Pulse, BTC Dominance, Altcoin Strength, Volatility, Leader, Weakest, Timeframe, and Data status all add context.

CRYPTO STRENGTH METER™

SETTINGS & CUSTOMISATION

1 STRENGTH TIMEFRAME

Auto is recommended.
It maps lower chart timeframes to steadier scanner timeframes.

2 CRYPTO DATA SOURCE

Choose **BINANCE**, **BYBIT**, or **OKX**.
Select your preferred exchange for crypto data and market coverage.

3 SCANNER SPEED

Fast reacts sooner.
Balanced is the recommended default.
Smooth is steadier.
Custom unlocks advanced fine tuning.

4 DASHBOARD & VISUALS

Control dashboard size, position, bars vs words, current pair badge, and coin symbols.
Make it look and feel right for your setup.

5 STRONG / WEAK LEVELS

Default levels are **Strong 70** and **Weak 30**.
These levels help identify the strongest and weakest coins in the market.

6 ADVANCED ENGINE

Fine-tune sensitivity, fast length, slow length, trend length, smoothing, strength change, and volatility normalization.
Adjust these if you want a more tailored experience.

QUICK TIP

Most traders can keep the default settings.
Start with **Auto** timeframe and **Balanced** speed for a clean, steady experience.

COIN TO WATCH CHANGES

Get an alert when the Coin To Watch changes to a new cryptocurrency.

MARKET LEADER CHANGES

Get an alert when the Market Leader changes to a different coin.

MARKET LAGGARD CHANGES

Get an alert when the Market Laggard changes to a different coin.

CURRENT CHART DIRECTION CHANGES

Get an alert when the current chart direction changes (Bullish, Bearish or Neutral).

SETUP STRENGTH REACHES LEVEL

Get an alert when the Setup Strength reaches a specific level (e.g. Good, Strong or Exceptional).

CURRENT CHART STRENGTH REACHES LEVEL

Get an alert when the current chart strength reaches a specific level (e.g. Weak, Neutral, Strong or Exceptional).

CRYPTO MARKET PULSE CHANGES

Get an alert when the overall Crypto Market Pulse changes (e.g. Bullish, Neutral or Bearish).

BTC DOMINANCE STATE CHANGES

Get an alert when the BTC Dominance state changes (e.g. Rising, Falling or Neutral).

HOW TO SET UP ALERTS ON TRADINGVIEW AND METATRADER (MT5/MT4)

1 ADD THE INDICATOR TO YOUR CHART
Load the VIP Algos - Crypto Strength Meter on your TradingView and MetaTrader (MT5/MT4) chart.

2 OPEN TRADINGVIEW AND METATRADER (MT5/MT4) CREATE ALERT
Click the Alert button (⏰) and select "Create Alert" from the menu.

3 CHOOSE THE ALERT CONDITION YOU WANT TO MONITOR
Select the Crypto Strength Meter alert condition that matches what you want to track.

ⓘ Alerts are designed to draw your attention to changes. They support your analysis and should not be treated as guarantees.

CRYPTO STRENGTH METER™

BEST PRACTICE WORKFLOW

1 START WITH AUTO

Let the scanner choose a steadier analysis timeframe.

2 CHECK MARKET CONTEXT

Read Market Pulse, BTC Dominance, Altcoin Strength, and Volatility first.

3 FOCUS ON STRONG VS WEAK

Look for leadership, weakness, and the Coin To Watch.

4 COMPARE THE CURRENT CHART

Use the Current Chart row to see whether the pair you are viewing has a bullish or bearish strength edge.

5 USE DISCIPLINED EXECUTION

Combine the scanner with your own entries, price action review, and risk management.

The scanner is a structured decision-support tool designed to help organise market information. Use it with judgment.
