QUICK OVERVIEW

USER GUIDE

What the scanner does and how it helps you find the strongest setups fast.

01	Scans up to 6 markets from one dashboard.
02	Checks 4 timeframes for each market — commonly 5M, 15M, 1H and 4H.
03	Combines trend, momentum, breakout structure and market activity into one final signal.
04	Auto-ranks the strongest current opportunity as the Top Setup.
05	Works across Forex, Gold, Crypto, Stocks and Indices.
06	Shows Trend, Strength and Final Signal at a glance.

POWERFUL BLENDED ENGINE

The scanner uses a blended engine built from EMA trend, RSI, MACD, ADX/DMI, ATR-normalized movement, breakout context and volatility expansion.

Strength / Score reflects signal clarity and confluence.
It is not a guaranteed outcome or win-rate.

DASHBOARD LAYOUT

HOW TO READ THE SCANNER TABLE QUICKLY AND CORRECTLY.

SMARTER TRADING BRIGHTER POSSIBILITIES

2 MARKET — The instrument being scanned.

3 5M / 15M / 1H / 4H — Individual timeframe readings for each market.

4 TREND — Shows the broader directional bias.

5 STRENGTH — Shows how strong and aligned the setup is.

6 FINAL SIGNAL — The combined result after weighting all timeframes and conditions.

1 TOP SETUP — The strongest ranked opportunity right now.

AI TRADING SIGNAL SCANNER™ • VIP ALGOS

MULTI-TIMEFRAME SCAN • 5M • 15M • 1H • 4H
CHECKS TREND • PRICE STRENGTH • KEY LEVELS • MARKET ACTIVITY

TOP SETUP: EURUSD • STRONG BUY • STRENGTH: VERY STRONG

MARKET	5M	15M	1H	4H	TREND	STRENGTH	FINAL SIGNAL
★ EURUSD	BUY	BUY	BUY	BUY	BULLISH	VERY STRONG	STRONG BUY
US500	WAIT	SELL	SELL	SELL	BEARISH	MEDIUM	SELL SETUP
GBPJPY	WAIT	SELL	SELL	SELL	BEARISH	MEDIUM	SELL SETUP

NEXT BEST • US500 • SELL SETUP • MEDIUM

7 NEXT BEST — The second-best actionable setup shown in the footer.

QUICK TIPS

- **BUY / SELL** cells show what each timeframe is currently suggesting.
- **WAIT** means conditions are mixed or not strong enough yet.
- The highlighted row helps you focus on the best current opportunity first.

UNDERSTANDING SIGNALS & STRENGTH

USER GUIDE

What the scanner is telling you and how to interpret it.

TRADE SMARTER
WITH AI INSIGHTS

MULTI-TIMEFRAME
MULTI-MARKET
REAL OPPORTUNITIES

STRONG BUY

Bullish alignment across multiple timeframes with strong overall confluence.

BULLISH

BUY SETUP

Bullish conditions are building, but the setup is slightly less aligned than Strong Buy.

BULLISH

WAIT

The market is mixed, neutral or not clear enough right now.

NEUTRAL

SELL SETUP

Bearish conditions are building, but the setup is slightly less aligned than Strong Sell.

BEARISH

STRONG SELL

Bearish alignment across multiple timeframes with strong overall confluence.

BEARISH

TREND & STRENGTH

01 Trend can show Bullish, Bearish or Neutral.

02 Strength can show Very Strong, Strong, Medium, Mixed or a numeric Score display.

03 When Strength Display is switched to Score, the dashboard shows the underlying confluence score instead of the text label.

KEY GUIDANCE

The best setups usually appear when the Final Signal, Trend and most timeframes are aligned together.

SETTINGS & MODES

USER GUIDE

The key options that shape how the scanner behaves.

TRADE SMARTER WITH AI

SMART SETTINGS
BETTER SIGNALS
A CLEARER EDGE

01 MARKETS TO SCAN

Enable or disable up to 6 markets and choose the symbol for each one. You can scan Forex, Gold, Crypto, Stocks and Indices in one place.

FOREX | GOLD | CRYPTO | STOCKS | INDICES | CUSTOM

02 TIMEFRAMES & WEIGHTING

Choose TF 1 to TF 4 and decide how much influence each timeframe has. Profiles include Scalping, Balanced, Swing and Custom.

SCALPING | BALANCED | SWING | CUSTOM

03 SIGNAL MODE

Confirmed uses closed source-timeframe data for more stable signals and is recommended for most users. Live Preview updates before the source candle closes, so readings can change.

CONFIRMED | LIVE PREVIEW

04 SIGNAL SENSITIVITY

Choose Responsive, Balanced, Conservative or Custom. Lower sensitivity thresholds produce more signals, while higher thresholds keep the scanner stricter.

RESPONSIVE | BALANCED | CONSERVATIVE | CUSTOM

05 DASHBOARD APPEARANCE

Adjust position, size, top setup emphasis, footer visibility and whether Strength is shown as a label or as a score.

POSITION | SIZE | TOP SETUP | FOOTER | STRENGTH DISPLAY

RECOMMENDED STARTING SETUP

Balanced weighting + Confirmed mode + Balanced sensitivity.

SAME DATA HIGHER CONFIDENCE

ALERTS & BEST WORKFLOW

USER GUIDE

AI TRADING SIGNAL SCANNER™ • VIP ALGOS

TRADE SMARTER • SPOT OPPORTUNITIES • STAY DISCIPLINED

How to use the scanner efficiently in real trading.

ALERT OPTIONS

Enable Multi-Market Alerts
Turns on dynamic alerts across all enabled markets.

Strong Signals Only
Only alerts when a market changes into Strong Buy or Strong Sell.

Include Score In Alert
Adds the internal confluence score to the alert text.

TradingView and MetaTrader (MT5/MT4) Setup
Create one alert and choose “Any alert() function call”.

RECOMMENDED WORKFLOW

01 Choose the markets you want to scan.

02 Select the four timeframes that fit your trading style.

03 Start with Confirmed mode for steadier dashboard readings.

04 Watch the Top Setup and Next Best rows first.

05 Open the selected market's chart for final confirmation and risk planning.

06 Stay patient when the dashboard shows mixed conditions or WAIT signals.

BEST PRACTICES

Focus on the strongest aligned setups first.

Use higher-timeframe agreement to improve context.

Live Preview is faster, but signals can change before the candle closes.

Always combine signals with your own risk management.
