VIP ALGOS

MARKET SCANNER

QUICK OVERVIEW

Identify opportunities. Know your levels. Plan with clarity.

- Displays Buy and Sell opportunities with entry, stop-loss, and take-profit levels.
- Uses a color-coded trailing structure to show bullish and bearish market direction.
- The opportunity panel summarises current price, entry, stop-loss, take-profit, and current opportunity.
- Useful for reviewing market structure, setup areas, and risk-to-reward planning.

VIP ALGOS

CLOUD BAND SIGNALS

03

QUICK OVERVIEW

Cloud Band Signals is a visual trend framework that helps traders identify momentum shifts and potential price reaction zones.

The red upper cloud can act as a resistance or bearish pressure area.

The green lower cloud can act as a support or bullish pressure area.

The middle ribbon helps show short-term trend and momentum shifts.

Buy Sell

Buy and Sell labels appear when market conditions align.

TREND
Bullish

The trend box adds broader direction context on the chart.

VIP
ALGOS

MARKET PREDICTION INDICATOR

QUICK OVERVIEW

Analyzes current market structure, recent price action, volatility, and trend direction.

Displays a forward visual path to help review possible market movement.

TREND
Bearish

The trend box provides bullish or bearish direction context.

Useful for reviewing momentum shifts and planning areas in a more structured way.

HOW IT WORKS

The Market Prediction Indicator uses advanced algorithmic analysis to evaluate key market factors and project a potential forward path. It is designed to support traders in reviewing scenarios and preparing for what comes next.

TREND NAVIGATOR & VIP OSCILLATOR

QUICK OVERVIEW

A dynamic trend-following system with built-in momentum confirmation to help you review market direction and potential shift areas.

01 The Trend Navigator line changes color to show bullish or bearish direction.

02 BUY / SELL — Buy and Sell labels help highlight potential trend-shift areas.

03 The VIP Oscillator adds momentum confirmation below the chart.

04 Green and red zones can help review overextended or reversal-style areas.

05 Used together, both tools create a double-confirmation workflow for cleaner setup review.

SUPPORT & RESISTANCE MATRIX

QUICK OVERVIEW

The Support & Resistance Matrix automatically highlights key market zones so you can quickly identify areas where price may react.

- Automatically maps green support zones and red resistance zones on the chart.
- Thicker zones can represent stronger or more tested market levels.
- Helps review potential breakout, rejection, and retest areas.
- Useful for visualizing market structure and planning zones.
- Support and resistance can shift roles after a break or retest.
