VIP ALGOS TREND NAVIGATOR & VIP OSCILLATOR GUIDE

UNDERSTAND TREND CONTEXT, OSCILLATOR CONFIRMATION & CLEANER CHART REVIEW

This guide helps you understand the indicator's visual layout, trend direction, momentum confirmation, and buy/sell label logic — so you can review charts with clarity and confidence.

TREND NAVIGATOR LINE

Dynamic line that follows trend direction.
Green = bullish
Red = bearish

VIP OSCILLATOR

Momentum oscillator with overbought (red) and oversold (green) zones for confirmation.

BUY & SELL LABELS

Buy
Sell

Clear visual prompts when conditions align with trend and momentum.

TREND BOX CONTEXT

TREND
Bearish ▼

At-a-glance trend direction and bias to stay aligned with market context.

VIP ALGOS TREND NAVIGATOR & VIP OSCILLATOR GUIDE

HOW TREND NAVIGATOR & VIP OSCILLATOR WORKS

This indicator combines a colour-changing trend line on the main chart with a lower momentum oscillator to help traders review trend direction, momentum pressure, and buy/sell labels more clearly.

1. TREND NAVIGATOR LINE

Colour-changing line shows the current trend direction.

Green = bullish

Red = bearish

2. BUY & SELL LABELS

Buy

Sell

Clear labels appear on the chart to highlight potential buy and sell opportunities.

3. VIP OSCILLATOR

Momentum oscillator measures market pressure in relation to overbought and oversold zones.

4. GREEN/RED OSCILLATOR MARKERS

Green triangles mark oversold bounce conditions.

Red triangles mark overbought pressure.

5. TREND BOX

TREND

Bearish ▼

At-a-glance trend direction summary to help align with market context.

TIP: Review the indicator as one complete system, not as separate pieces.

VIP ALGOS

STEP 1: REVIEW THE TREND DIRECTION

The Trend Navigator line helps you read whether market direction is currently bullish or bearish.

1 GREEN LINE = BULLISH TREND CONTEXT

The green Trend Navigator line shows that the market is in a bullish trend context.

2 RED LINE = BEARISH TREND CONTEXT

The red Trend Navigator line shows that the market is in a bearish trend context.

3 FOLLOWS PRICE TO SIMPLIFY TREND REVIEW

The line follows price movement to help you quickly see the current trend direction.

4 BUY & SELL LABELS HIGHLIGHT KEY MOMENTS

Buy and Sell labels often appear when trend direction changes or when conditions align with the indicator.

5 USE WITH PRICE STRUCTURE, NOT ALONE

Combine the Trend Navigator line with price structure, momentum, and context for better decision-making.

START WITH DIRECTION FIRST, THEN LOOK FOR CONFIRMATION.

Educational use only • Trading involves risk • Use your own judgement

VIP ALGOS

STEP 2: USE THE VIP OSCILLATOR FOR CONFIRMATION

The lower panel helps traders review momentum pressure, overbought/oversold zones, and possible turning points.

RED UPPER ZONE
Overbought / strong upside stretch area.

GREEN LOWER ZONE
Oversold / downside stretch area.

GREEN TRIANGLES
Can highlight potential bullish turning points.

RED TRIANGLES
Can highlight potential bearish turning points.

OSCILLATOR CONFIRMATION
Can help confirm the main Trend Navigator line.

TIP: LOOK FOR CONFIRMATION BETWEEN MOMENTUM AND TREND DIRECTION.

Educational use only • Trading involves risk • Use your own judgement

VIP ALGOS

STEP 3: COMBINE THE TWO FOR CLEANER SIGNALS

TREND NAVIGATOR AND THE VIP OSCILLATOR WORK TOGETHER AS A DOUBLE-CONFIRMATION WORKFLOW.

1 CHECK TREND DIRECTION

Identify the overall trend using the Trend Navigator line and direction.

2 REVIEW OSCILLATOR ZONE & MARKER

Check where the VIP Oscillator is (overbought or oversold) and note the latest marker.

3 LOOK AT THE BUY OR SELL LABEL

Buy or Sell

Note the most recent Buy or Sell label on the main chart.

4 COMPARE WITH PRICE ACTION & YOUR VIEW

Compare the signals with current price action and your own chart analysis for context.

BUY LABEL CONTEXT

Buy

Many traders look for alignment where the trend line is bullish, the oscillator is in or rising from the oversold zone, and price action shows supportive conditions.
Use this as part of your review, not as a guarantee.

SELL LABEL CONTEXT

Sell

Many traders look for alignment where the trend line is bearish, the oscillator is in or falling from the overbought zone, and price action shows confirming conditions.
Use this as part of your review, not as a guarantee.

CLEARER ALIGNMENT CAN HELP REDUCE CHART NOISE.

Educational use only • Trading involves risk • Use your own judgement

STEP 4: USE THE TREND BOX AS EXTRA CONTEXT

The trend box in the top-right gives a quick at-a-glance directional bias.

TREND BOX = BROADER CONTEXT
The trend box summarizes the overall directional context based on the indicator's logic.

BULLISH OR BEARISH BIAS
Shows whether the indicator favors a bullish or bearish market bias.

USE IT TOGETHER WITH THE MAIN CHART
Always review the trend box alongside the Trend Navigator line and the oscillator for full context.

DO NOT IGNORE LIVE PRICE STRUCTURE
Price action is always king. Confirm with real-time structure before taking any action.

TIP: The trend box helps you understand the big picture. Use it to align your bias, but always let confirmation and price action guide your final decision.

Educational use only • Trading involves risk • Use your own judgement

BEST WAYS TO REVIEW THE CHART

A simple routine can make the indicator easier to use across different TradingView and MetaTrader (MT5/MT4) markets and timeframes.

01 START WITH DIRECTION

Check the Trend Navigator for the current bias: Bullish or Bearish.

02 CHECK THE OSCILLATOR

Review momentum and overbought/oversold zones for added confirmation.

03 NOTE THE LABEL

Use Buy/Sell labels as visual cues for potential momentum shifts.

04 REVIEW NEARBY PRICE STRUCTURE

Look at support, resistance, and recent swing highs/lows for better context.

05 USE YOUR PREFERRED TIMEFRAME

Apply the indicator across timeframes that match your trading style.

06 KEEP YOUR CHART PROCESS SIMPLE

Follow a consistent routine to stay clear, focused, and objective.

CLEANER CHART WORKFLOW • MULTI-MARKET USE • VISUAL CONFIRMATION

VIP ALGOS

KEEP IT SIMPLE

Trend Navigator & VIP Oscillator is designed to help traders review trend direction, momentum confirmation, and market context in one cleaner chart workflow.

- ☑ Review direction first
- ☑ Use the oscillator for confirmation
- ☑ Watch the Buy/Sell labels
- ☑ Stay aware of market context
- ☑ Keep your own risk management

CLEAR TREND CONTEXT. MOMENTUM CONFIRMATION.

A CLEANER TRADINGVIEW AND METATRADER (MT5/MT4) WORKFLOW.
