ALGOS

Welcome To The
VIP Algos Guide

This short guide shows how to use Cloud Band Signals™
in a simple and structured way.

1

Learn how the cloud bands work

2

Understand Buy & Sell signals

3

Review support & resistance zones

4

Use the indicator with more structure

Cloud Band Signals™ combines dynamic upper and lower bands, a trend ribbon, and **Buy** & **Sell** signals to help traders review market direction on TradingView and MetaTrader (MT5/MT4) charts.

Educational use only • Trading involves risk • Use your own judgement

VIP ALGOS

How Cloud Band Signals™ Works

The indicator combines cloud bands, Buy & Sell signals, and a trend box to show market context.

Review the signal together with the cloud bands and your own market view.

3

Educational use only • Trading involves risk • Use your own judgement

VIP ALGOS

Step 1: Read the cloud bands

The upper and lower bands help map possible resistance and support areas.

Upper red band

Use as a possible resistance reference area

Middle ribbon

Review short-term trend direction and movement

Lower green band

Use as a possible support reference area

The cloud bands are visual planning tools, not guarantees.

Educational use only • Trading involves risk • Use your own judgement

Step 2: Review a BUY signal

When a BUY signal appears, review it together with the lower band and trend context.

1 Buy

Wait for a BUY signal

Look for a clear BUY signal on the chart.

2

Check if price is near the green band or moving up from support.

3 TREND Bullish

Review trend direction and the trend box.

4

Use your own risk management before acting.

Use the signal together with your own market view and risk management.

5

VIP ALGOS

Step 3: Review a SELL signal

When a SELL signal appears, review it together with the upper band and trend context.

1. Wait for a **SELL** signal
2. Check if price is near the red band or reacting from resistance
3. Review trend direction and the trend box
4. Use your own risk management before acting

Use the signal together with your own **market view** and **risk management.**

Step 4: Alerts, markets & simple rules

Cloud Band Signals™ can be used across multiple TradingView and MetaTrader (MT5/MT4) markets and time frames.

All markets

Works across stocks, crypto, forex, futures and more.

Any time frame

Use on any TradingView and MetaTrader (MT5/MT4) time frame.

Live alerts

Get notified instantly on Buy & Sell signals.

Default settings work well

Designed to be effective right out of the box.

Simple rules

- Add the indicator to your TradingView and MetaTrader (MT5/MT4) chart
- Set alerts for Buy and Sell signals
- Review the signal together with the cloud bands
- Use the trend box as added context
- Use your own judgement and risk management

VIP ALGOS

Keep It Simple

A clean routine can help you use
Cloud Band Signals™ more effectively.

1. 1 Red upper band = possible resistance
2. 2 Green lower band = possible support
3. 3 Buy & Sell labels = signal markers
4. 4 Trend box = direction context
5. 5 Review the signal with the cloud bands together
6. 6 Use alerts and your own risk management

Clear bands. Clear signals. A cleaner chart workflow.
