HOW THE INDICATOR WORKS

Understand the main parts of the Market Scanner workflow.

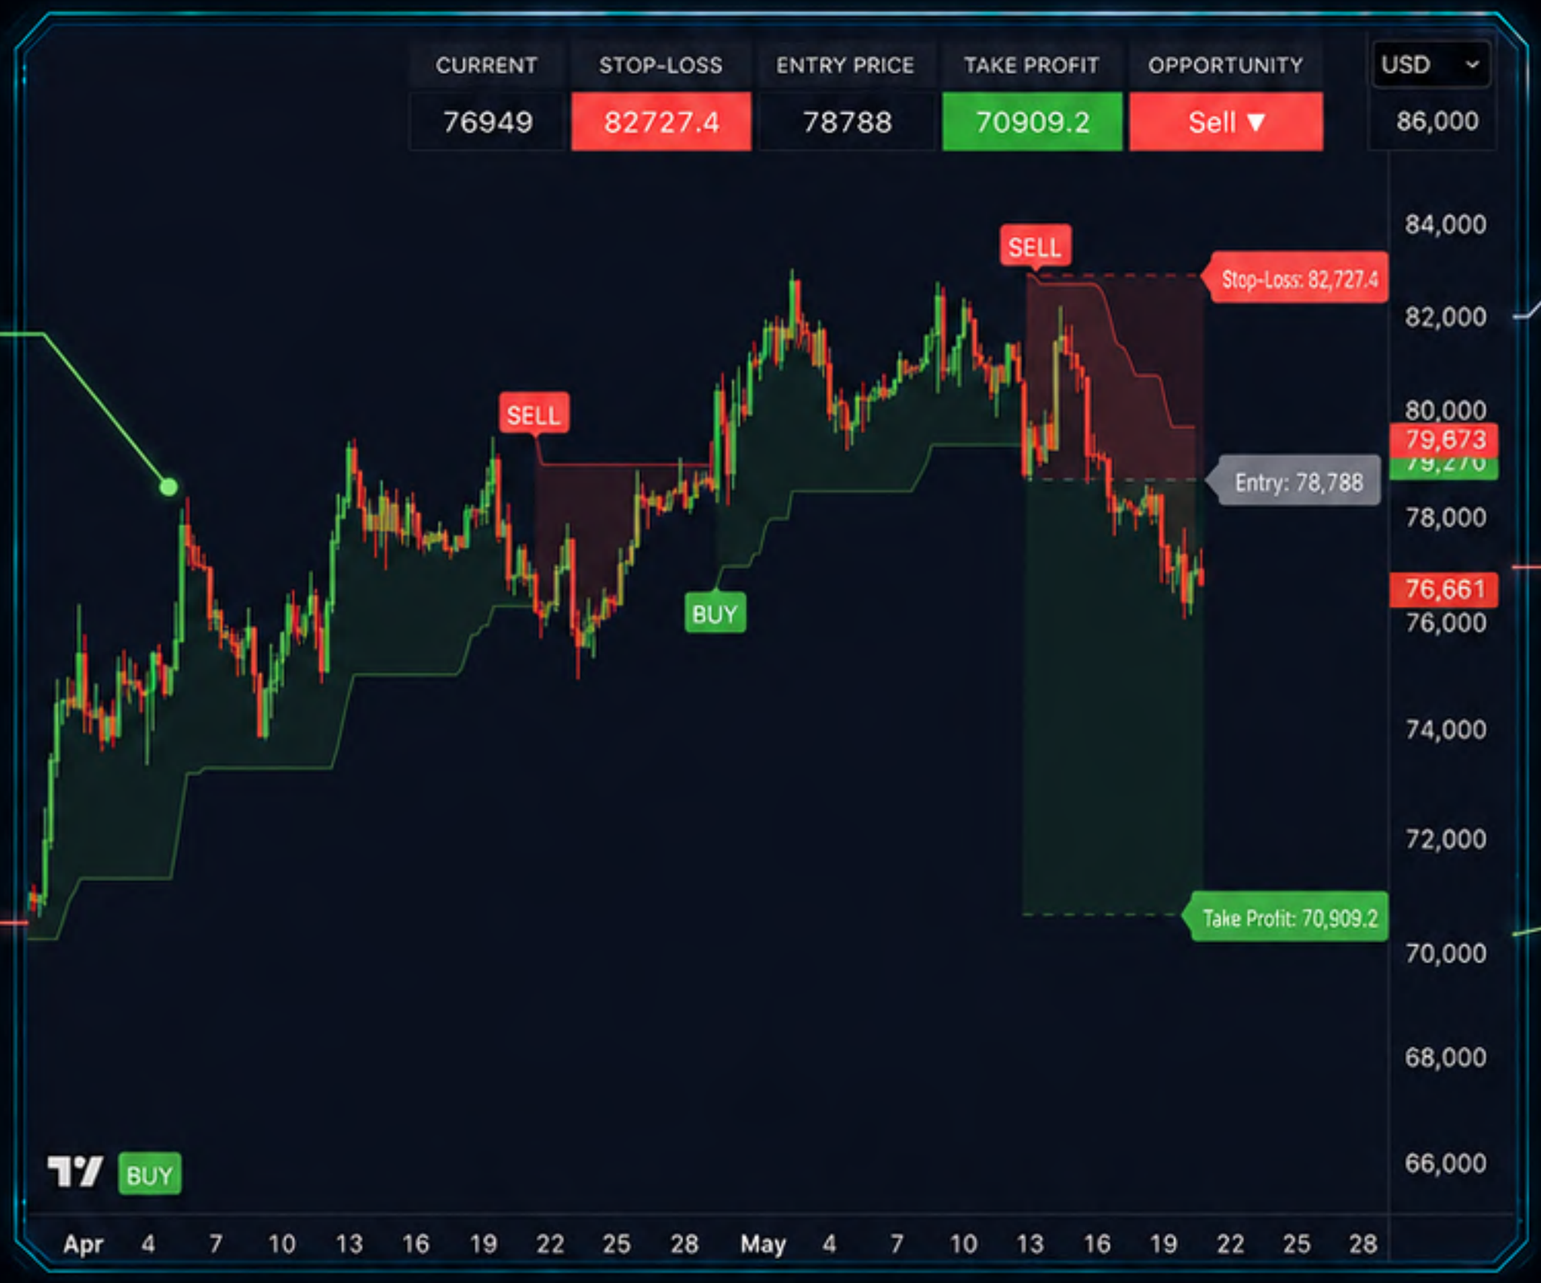

1 Buy & Sell Signals

Marks possible setup direction directly on the chart.

2 Strong Buy / Strong Sell

Higher-conviction signals that highlight potentially stronger opportunities.

Strong Buy | Strong Sell

3 Entry Price

The planned entry zone. Price retrace to this level before entering the trade.

4 Stop-Loss

The risk level placed below (long) or above (short) the setup.

5 Take Profit

The target zone where profits are taken based on the indicator's projection.

Top Status Boxes

At a glance view of the key levels and current market context.

CURRENT Live price | STOP-LOSS Risk level | ENTRY PRICE Planned entry | TAKE PROFIT Target level | OPPORTUNITY Setup bias

VIP ALGOS

READING BUY & SELL SIGNALS

Use the signal labels together with chart context.

Buy labels highlight bullish setup areas. Look for alignment with the trend.

Sell labels highlight bearish setup areas. Look for alignment with the trend.

Strong Buy / Strong Sell can be reviewed as higher-conviction setup signals.

The colored background / channel helps show market context around the signal.

3-STEP WORKFLOW

1 IDENTIFY THE SIGNAL LABEL

Spot the Buy, Sell, Strong Buy, or Strong Sell label on the chart.

2 REVIEW THE TREND / CHANNEL CONTEXT

Check the channel direction and price position for additional context.

3 CHECK THE PLANNED LEVELS

Review the Entry, Stop-Loss, and Take-Profit levels shown on the chart before acting.

VIP ALGOS

ENTRY, STOP-LOSS & TAKE-PROFIT

Plan each setup with clear levels.

The indicator can display Entry Price, Stop-Loss and Take Profit levels to help structure each setup.

These levels appear on the chart and in the top metric bar for quick reference.

ENTRY

The planned level where the setup begins.

STOP-LOSS

The risk limit level used to protect the trade.

TAKE PROFIT

The planned target area for the setup.

OPPORTUNITY

The directional setup label shown by the indicator.

Use these levels to review risk-to-reward structure more clearly and make more informed trading decisions.

STRONG BUY & STRONG SELL

Review higher-conviction signal labels in context.

Strong Buy and Strong Sell labels highlight higher-conviction opportunities. Use them to review standout setup areas where the indicator is signaling stronger directional conviction than a regular Buy or Sell label.

1. COMPARE

Compare the signal with nearby price structure.

2. CHECK

Check whether the channel / background supports the direction.

3. REVIEW

Review the planned levels: Entry, Stop-Loss, and Take-Profit.

4. APPLY

Always apply your own judgement.

A SIMPLE STEP-BY-STEP WORKFLOW

A clean way to review setups on the chart.

1. Scan for Buy, Sell, Strong Buy, or Strong Sell labels.
2. Review the colored market context around the setup.
3. Check Entry, Stop-Loss, and Take-Profit levels.
4. Compare the setup with your preferred timeframe and market.
5. Manage the trade using your own plan.

MARKETS, ALERTS & CHART SETUP

Use the indicator cleanly inside TradingView and MetaTrader (MT5/MT4).

MULTI-MARKET USE

Use across Forex, Crypto, Indices, Commodities, and Stocks—any market available on TradingView and MetaTrader (MT5/MT4).

ALERTS & NOTIFICATIONS

Set alerts on Buy/Sell signals, Take-Profit hits, or Stop-Loss levels to stay informed in real time.

TIMEFRAME FLEXIBILITY

Works on any timeframe from scalping to swing trading. Adjust to match your strategy and style.

KEEP CHARTS CLEAN

One visual workflow. Clear signals, key levels, and nothing extra—so you can focus on execution.

Designed to simplify chart review with one visual workflow—so you can plan faster, trade with confidence, and stay consistent.

KEEP IT SIMPLE

You now have a clear framework to review signals, planned levels, and market context — all in one cleaner workflow.

1. REVIEW SIGNALS WITH CONTEXT

Always review Buy and Sell signals in relation to the surrounding market context.

2. USE PLANNED LEVELS

Use the Entry, Stop-Loss, and Take-Profit levels as your planning tools — not guarantees.

3. COMPARE THE BIG PICTURE

Strong signals have more weight when they align with the overall chart structure.

4. MANAGE YOUR RISK

Keep your own risk management rules consistent on every trade setup.

5. USE YOUR OWN JUDGEMENT

This tool provides clarity, but the final decision should always be yours.

CLEARER SIGNALS. CLEANER STRUCTURE. A SMARTER CHART WORKFLOW.
