UNDERSTANDING THE PATTERN ENGINE

How harmonic mapping becomes simpler

PATTERN ENGINE DASHBOARD

- TAKE PROFIT 2** — Higher target for extended moves
- TAKE PROFIT 1** — First target for partial profits
- ENTRY** — Potential entry zone near D
- STOP LOSS** — Risk level beyond D zone

C is the last swing high before the final move.

Price reverses from C and moves toward D.

D is the completion zone where the setup finishes.

The Pattern Engine verifies structure and ratios.

MINI GLOSSARY

X-A-B-C-D = key pattern swing points

D = completion area

CLEAR VISUAL STRUCTURE

Instant pattern recognition with clean mapping and key levels.

FASTER CHART READING

Less guesswork, more clarity. See the full setup in seconds.

STRUCTURED PLANNING

Entries, targets, and risk levels are mapped for disciplined execution.

BEGINNER FRIENDLY

Simple to understand. Powerful for all experience levels.

QUICK IDEA

The indicator does the heavy chart work by scanning harmonic structures and organizing the setup into a clearer trading plan.

PATTERN TYPE

The structure detected, such as Gartley, Bat, Crab, Butterfly, Shark, Cypher, ABCD, White Swan, Black Swan.

BIAS

Shows the directional bias of the setup: Bullish  or Bearish .

D ZONE

Identifies the completion area where the pattern is likely to finish.

ENTRY / TP1 / TP2 / SL

Provides structured planning levels for entries, targets, and risk control.

RATIOS

Automatically checks Fibonacci relationships to validate the pattern.

ALERTS

Sends TradingView and MetaTrader (MT5/MT4) notifications when conditions are detected.
