UNDERSTANDING BUY ZONES

USER MANUAL

VIP Algos highlights support zones where price may react. When a buy signal becomes active, the dashboard shows bullish context and the next target area to review.

This helps you structure chart analysis across all timeframes, including 1-minute and 5-minute setups.

BULLISH EXAMPLE

BEARISH EXAMPLE

Resistance Level acts as a logical review point where price may react or pause.

AI-highlighted zones help you plan entries, reviews, and potential exits with clarity.

Works across all timeframes — from scalping on 1m charts to swing setups on higher timeframes.

BUY ZONE

Highlights potential support zones (green zones) where price may find strength and react higher.

SUPPORT LEVEL

Key support zones act as foundations for bullish setups and help define risk areas.

BULLISH DASHBOARD CONTEXT

When Buy is Active, the dashboard confirms bullish trend and shows the next target area to review.

TARGET AREA

The next logical target is highlighted (e.g., Resistance Level) to help guide your trade plan.

ALERTS

Stay informed when buy signals activate so you never miss important chart updates.

vipalgos.com

contact@vipalgos.com

AI-identified resistance zones help you spot potential reaction areas and plan structured sell setups with confidence.

BEARISH EXAMPLE

1. SELL SIGNAL

When conditions align, a sell signal becomes active, guiding you to lower probability long bias and potential short opportunities.

2. RESISTANCE LEVEL

AI marks resistance zones in red/pink where price has a higher chance to react. These areas act as smart reference points for sells.

3. BEARISH DASHBOARD CONTEXT

Dashboard confirms the bearish bias and shows the active sell signal with the next support target in focus.

4. SUPPORT TARGET

The next support level is highlighted as the take profit (TP) area. This serves as a structured review zone for the potential move.

5. ALERTS

Use alerts to stay updated when price reaches key zones. Perfect for active traders and busy schedules.

Use across all timeframes — from scalping on 1-minute charts to swing trading on 5-minute or higher. The AI adapts to market structure and highlights the most relevant levels.

DASHBOARD & CORE FEATURES

The dashboard helps you review market structure, direction, and key zones more clearly.

BULLISH EXAMPLE

BEARISH EXAMPLE

AI ZONE ENGINE

Automatically identifies support and resistance areas based on recent price structure so you can view the most relevant zones.

SIGNAL STATUS

Clearly shows whether a buy or sell setup is active right now—so you know when to pay attention.

TREND CONTEXT

Displays the current directional bias as Bullish or Bearish to help you understand the bigger picture.

TARGET GUIDANCE

Highlights the next key support or resistance area being watched as the primary objective.

TP MARKER

Provides a simple, clean take profit reference based on the active target area.

ALL-TIMEFRAME USE

Designed to be effective across any timeframe, from 1-minute charts to higher timeframes.

01

CHOOSE YOUR MARKET AND TIMEFRAME

Select the market you want to analyze and the timeframe that fits your trading style.

02

IDENTIFY THE NEAREST AI SUPPORT AND RESISTANCE ZONES

Locate the closest support (green) and resistance (red) zones highlighted by the AI.

03

REVIEW WHETHER A BUY OR SELL SIGNAL IS ACTIVE

Check the current signal on the dashboard to understand market direction at a glance.

04

USE THE DASHBOARD TO CHECK TREND CONTEXT AND TARGET AREA

Confirm the trend direction and review the target or take profit area provided for the active setup.

05

BUILD A STRUCTURED PLAN AND MANAGE RISK CAREFULLY

Plan your entry, invalidation level, and risk management before taking action.

This tool is built to simplify chart review for both beginners and more experienced traders. It helps you spot important zones more easily—whether you trade **1-minute**, **5-minute**, or any other timeframe.
