READING THE DASHBOARD

WHAT THE SCANNER IS MEASURING AND HOW TO READ IT.

1 8 MAJOR CURRENCIES

Tracks USD, EUR, GBP, JPY, CHF, CAD, AUD and NZD.

2 28-PAIR STRENGTH ENGINE

Builds each currency score by comparing the full major FX basket.

3 STRENGTH SCORE

Scores run from 0 to 100. Around 50 is more neutral.

HOW TO USE IT

A SIMPLE STEP-BY-STEP WORKFLOW
FOR EVERYDAY USE.

1

CHECK THE RANKING

Start by seeing which currencies are strongest and weakest.

2

LOOK AT PAIR TO WATCH

Use the scanner's featured pair as your main idea to review.

3

OPEN THE CHART

Load that pair and see if price structure supports the strength bias.

4

USE TIMEFRAMES SMARTLY

Use higher timeframes for the overall read and lower timeframes for entries.

5

TRADE WITH A PLAN

Use the scanner as structured guidance, then manage risk with your own rules.

SETTINGS & SCANNER CONTROLS

USER GUIDE

Recommended defaults and the most useful customisation options.

1 STRENGTH TIMEFRAME

Auto is recommended.
It keeps the scanner on a steadier higher timeframe when needed.

2 AUTO TIMEFRAME LOGIC

1m - 15m chart = 1H strength
30m - 2H chart = 4H strength
3H - 11H chart = 1D strength
12H+ chart = 1W strength

3 FOREX DATA SOURCE

FX_IDC is the default.
If coverage is weak, try **OANDA** or **FOREXCOM**.

4 SCANNER SPEED

Fast reacts sooner,
Balanced is the main default, **Smooth** is steadier, and **Custom** unlocks advanced controls.

5 DASHBOARD SIZE & POSITION

Choose **Compact / Mobile**, **Standard** or **Large**, and place the panel where it suits your chart.

6 STRENGTH DISPLAY

Use **Bars** for a fast visual read or **Words** for a more text-based display.

7 EXTRA VISUALS

Optional current pair badge and currency flags can be turned on or off.

8 STRONG / WEAK LEVELS

Default levels are **70** for strong and **30** for weak.

SCANNER DASHBOARD (EXAMPLE)

ALERTS & BEST PRACTICE

Useful alert ideas and simple habits for a better workflow.

ALERTS YOU CAN USE

01

Pair To Watch changes

When a new leading pair becomes the scanner focus.

02

Strongest currency changes

When the top-ranked currency changes.

03

Weakest currency changes

When the lowest-ranked currency changes.

04

Current chart direction changes

When the live pair bias flips bullish or bearish.

05

Pair strength reaches level

When the Pair To Watch reaches your chosen strength threshold.

06

Current chart strength reaches level

When the current pair's strength gap reaches your chosen level.

BEST PRACTICE

01

Use it on major FX pairs for the best match.

02

Auto timeframe and Balanced speed are the easiest starting point.

03

Look for stronger currencies against weaker currencies.

04

H1, H4 and Daily can give steadier reads.

05

Use the scanner as confirmation, not as a promise.

06

Manage entries, exits and risk with discipline.

Strength percentages are relative readings, not win rates or guarantees.
