

AUTO TREND LINES

Automatic trend-line structure, made simple

Auto Trend Lines helps simplify chart reading by automatically mapping major trend lines across markets and timeframes. It scans price action in real time to identify significant swing points and draws clean, high-probability trend lines—so you can focus on what matters.

Trend lines can help traders visualise trend direction, market structure, and key reaction areas where price may find support or resistance. Auto Trend Lines helps you see structure faster and plan with more clarity—without drawing every line manually.

PREMIUM FEATURES

Automatic trend-line detection

Market structure context

Bullish & bearish trend mapping

Breakout awareness

Multi-timeframe use

UNDERSTANDING TREND LINES

Why they matter in chart reading

Trend lines are one of the most widely used charting tools because they help traders see what's really happening beneath the noise. They provide a simple visual way to understand direction, market structure, key support and resistance areas, and potential breakout zones.

Auto Trend Lines takes the guesswork out of manual drawing by automatically detecting important swing points in real time and plotting the major trend lines for you. This saves time, improves consistency, and helps you read the chart with clarity and confidence.

1. TREND DIRECTION

Shows whether price is moving higher or lower overall.

2. STRUCTURE

Highlights the path price is respecting over time.

3. SUPPORT & RESISTANCE

Trend lines can act as reaction areas.

4. BREAKOUT CONTEXT

A break of a major line can signal changing market conditions.

TREND LINE BASICS

HOW THE AUTO TREND ENGINE WORKS

Major structure, mapped automatically

REDUCES MANUAL CHART CLUTTER

Auto-maps only the major trend lines you need—so your charts stay clean and clear.

FOCUS ON WHAT MATTERS

Filters out the noise and highlights the key levels that define market structure.

WORKS ACROSS ALL MARKETS

Designed to adapt to any market environment—from fast crypto to traditional FX.

1

SWING-POINT DETECTION

Finds meaningful highs and lows in price action.

5

LIVE TREND STATUS

Bullish ▲

Bearish ▼

Displays a clean, actionable bullish or bearish trend view.

THE TREND ENGINE

2

TREND-LINE MAPPING

Connects major structure points automatically.

4

BREAK MONITORING

Watches for important line breaks or invalidations in real time.

3

BULLISH / BEARISH CLASSIFICATION

Organises trend lines by direction for clear market context.

BUILT FOR EVERY MARKET ENVIRONMENT

Forex

Crypto

Indices

Commodities

Stocks

Metals

All markets

All timeframes

TradingView and MetaTrader (MT5/MT4) alerts

Faster chart reading

Less manual drawing

Visual planning

Easy to follow

BULLISH TREND EXAMPLE

How an uptrend can be structured

SETUP SUMMARY

DIRECTION
Bullish

STRUCTURE
Rising trend lines

CONTEXT
Higher lows

FOCUS
Trend continuation

ALERTS
Active

1 CHECK TREND DIRECTION

Confirm the overall slope is rising.

2 WATCH LINE REACTIONS

See how price respects key support lines.

3 MONITOR BREAKS

A strong break can change the structure.

PLAN WITH CONTEXT

Use the major lines to frame entries and risk.

Bullish trend lines can help traders visualise momentum and potential support areas. They highlight the path of least resistance and where buyers may step in. However, no line is perfect—always use confirmation and risk management.

BEGINNER WORKFLOW: 4 SIMPLE STEPS

1

REVIEW TREND CONTEXT

Confirm price is
respecting a downward
structure.

2

TRACK MAJOR LINES

Focus on the most
important resistance
lines.

3

WATCH FOR REACTIONS

Price may react
around the trend
line area.

4

PLAN RISK CAREFULLY

Use the structure to
frame invalidation
and targets.

WHY IT MATTERS

Bearish trend lines can
help traders see direction,
pressure, and potential
reaction zones.

They should always be used
with confirmation and
risk control.

BEST PRACTICES & RISK MANAGEMENT

Use structure with discipline

WHAT TO LOOK FOR

Clean swing points

Identify obvious highs and lows to anchor your trend lines.

Clear line respect

Price should react to the line multiple times.

Repeated reactions

The more touches, the stronger the structure.

Multi-touch structure

Look for at least 2-3 touches on the trend line.

Logical market context

Align trend lines with the overall market direction and structure.

EXAMPLE: BULLISH TREND STRUCTURE

BEST PRACTICES

Confirm with your own analysis

Use trend lines as a guide, not as a signal.

Avoid forcing trades

Wait for the setup to come to you.

Respect invalidation

If the line breaks with strength, step aside.

Use stop-losses

Protect your capital on every trade.

Adapt to market conditions

Structure changes—stay flexible.

Stay disciplined

Consistency comes from following your plan.

“Trend lines are a planning tool, not a guarantee.”
