UNDERSTANDING THE SIGNAL DASHBOARD

Know what the indicator is showing at a glance

The Signal Dashboard gives you a real-time snapshot of Smart Money analysis so you can make faster, more confident trading decisions.

BIAS
The overall directional outlook based on Smart Money structure. Determines whether we favor BUY or SELL.

POWER
The strength of the current bias. Strong power = higher probability. Weak power = lower conviction.

0% 100%

MARKET
Market condition filter that measures volatility and trend environment.

VOLATILE | FAST

ENTRY
The key level where the algorithm expects price to trigger the trade.

TARGET
The projected take-profit level based on Smart Money targets and liquidity objectives.

STOP
The protective stop level used to manage risk and invalidate the setup.

HOW TO READ IT

1. **Check Bias** — Understand the direction.
2. **Review Power** — Confirm the strength of the setup.
3. **Note Entry/ Target/Stop** — Know your plan before you trade.
4. **Wait for confirmation** — Let price trigger and manage risk.

DASHBOARD EXAMPLE

BIAS	BUY BIAS	
POWER	STRONG	100%
MARKET	VOLATILE	FAST
ENTRY	1.16132	TRIGGER
TARGET	1.16493	TP3
STOP	1.15804	RISK

BULLISH SETUP EXAMPLE

How a long idea is structured

EURUSD • 15m — BULLISH SETUP IN ACTION

SIGNAL DASHBOARD SNAPSHOT

BIAS	BUY BIAS	DEMAND
POWER	STRONG	100%
MARKET	VOLATILE	FAST
ENTRY	1.16127	TRIGGER
TARGET	1.16259 / 1.16493	TP1 / TP3
STOP	1.16043	RISK

4-STEP BEGINNER WORKFLOW

1 Identify the Bullish Bias or Demand-Led Setup

The indicator can highlight a **BUY BIAS** with demand structure and a potential shift in market direction.

2 Review Signal Strength & Market Condition

Check the power level and volatility.
Strong power in a fast market can support stronger setups.

3 Plan Entry, Target & Stop

Use the suggested entry, take profit levels (TP1–TP3), and stop level to create a clear trade plan.

4 Manage Risk & Follow the Plan

Apply appropriate position sizing and follow your rules.
Let the plan guide your decisions.

KEY LEVELS AT A GLANCE

ENTRY	1.16127
TP1	1.16259
TP2	1.16259
TP3	1.16493
STOP	1.16043

- Break above structure can indicate bullish continuation.
- TP1 can act as the first potential take profit zone.
- TP2 can be used to secure partial profits.
- TP3 may highlight an extended upside target.
- Stop level can help define risk and protect capital.
