SCALPING PREDICTION OSCILLATOR

A clean confirmation tool for short-term pressure shifts.

VIP Algos - Scalping Prediction Oscillator

1 SCALP PRESSURE

Cyan pressure above zero shows bullish force; pink pressure below zero shows bearish force.

2 SIGNAL LINE

The white line smooths pressure and helps confirm shifts.

3 OVERBOUGHT / OVERSOLD ZONES

Extreme areas provide context for stretched moves.

4 DIRECTION CHANGE ARROWS

Sparse arrows appear after meaningful pressure regime shifts.

5 ZONE EXIT MARKERS

Small markers show pressure leaving an extreme zone.

6 MICRO DASHBOARD

Summarises Pressure, Momentum, Zone and Signal state.

HOW TO USE IT

01

Confirm the direction from Prediction Pro

02

Wait for pressure to support that direction

03

Avoid treating every extreme reading as an instant signal
