2.10 ATR

LIVE MAP FIELDS EXPLAINED

SIGNAL	Current trading signal status
NEXT STEP	What the market needs to do next
BUY ABOVE	Price level to the upside
SELL BELOW	Price level to the downside
TRADE	Current trade state
PROGRESS	Where we are in the breakout process
TP1	First target after breakout
TP2	Second target after breakout

-  **WAITING** (Default)
Price is inside the range. No trade yet.
-  **BUY ABOVE**
A bullish breakout above this level.
-  **SELL BELOW**
A bearish breakout below this level.
-  **BREAKOUT CONFIRMED**
Price has broken the level.
Trade with confirmation only.

Educational use only. Trading involves risk.
This indicator does not provide financial advice.

UNDERSTANDING THE ZONES

The chart always shows two decision levels

Price inside the range = wait

Close above **BUY ABOVE** = bullish breakout

Close below **SELL BELOW** = bearish breakout

The dashboard keeps the levels visible

EURUSD • 1H

USD

1 BUY ABOVE

Breakout level to the upside

2 GREY DECISION RANGE

No-trade zone. Wait for price to exit this range.

3 SELL BELOW

Breakout level to the downside

WHAT THE ZONES HELP YOU ACHIEVE

CLEAR STRUCTURE
Defines key levels so you always know what matters most.

VISUAL CONFIRMATION
Wait for price to break and close beyond a level before taking action.

DIRECTION AWARENESS
Understand exactly which side has momentum after a confirmed breakout.

SIMPLE BREAKOUT LOGIC
No indicators to interpret. Just clear levels and clean decisions.

Educational use only. Trading involves risk. Use your own judgment.
